

Hello! Here is some info from GL Plumbing. Also at the bottom there is a clip and link to Sky HI from the Mayor of GL.

URGENT!!! East Troublesome Fire

Grand Lake Plumbing Heating & SweetWater Pumps

We have remained closed these past 3 days. During this time, we have been working to gain accurate information and we have been in communication with Three Lakes Water and Sanitation District, Mountain Parks Electric, our mayor and the county commissioners.

As of a 9:30 pm on Saturday night, the county included us in a meeting regarding how to best protect the homes with the cold front approaching and now power or gas. The County made the decision to provide a sheriff escort for contractors to enter homes of people who voluntarily sign up and the contractor will shut your well power off, turn off your city water supply at your valve in the home and gravity drain as much of the plumbing pipes.

We are attended a 9:00 am meeting Sunday morning with the county and were dispatched shortly after that with a sheriff escort to begin the process.

We will be working with The Grand County Builders Association and many of the builder and trade members, Jackson plumbing, B&J Plumbing, Hydroteck, Jason Stigers, Granby Heating and Sheet Metal, Rocky Mountain Heat Connection, Power to the People, Trail Electric, Mountain Top Builders and our building community to do the best we can today. We have trade volunteers and we will be following the county's dispatch directions. We have approximately 40 volunteers so we should be able to make great progress today assuming we can gain access.

This is a process we are supporting the county in. We do NOT have access to the area or homes without a police escort and we will NOT be able to address anything heat related nor will we be doing a full winterization on the homes. This is a community effort to help prevent floods and water damage once the power and gas is restored to the home.

Please visit [Sky HI News](#) and be sure to [sign up](#) if you want this service performed. The article came out in Sunday's paper.

Best, GLP

From Sky Hi

Grand Lake Town Manager John Crone was able get back in on Friday and see some of the damage caused by the East Troublesome Fire.

Crone said that a fire line has been constructed along the northern edge of West Portal Road, and the 100-year-old Grand Lake Lodge is still standing, as are the surrounding neighborhoods.

Crone confirmed that the Columbine Lake neighborhood was hard hit on its western edge and along County Road 495. However, he also said that “there are a significant number of homes still standing in Columbine Lake – a significant number.”

Crone also said that the Sun Valley neighborhood has been absolutely devastated by the fire.

There was significant damage along Golf Course Road as well, Crone continued, but the golf course and its club house both survived the fire, though a maintenance shed did not.
